Documenting Technical Contributions Rubric
(Ver. 2023-01-04)

You and your team use the EDN as your design notebook. Your ability to document your design process, progress, and accomplishment is evaluated once a week from the third week through the fifteenth week. The points earned for all 13 weeks are totaled into your semester Documenting Technical Contributions grade.

The student must post at least **four** messages describing technical work each week to Forum/Design and/or Background Information. Table 1 shows the grading rules. In addition to original technical contributions, providing specific and actionable feedback to a teammate's message is also a technical message. See Project Documentation for additional information.

*Table 1 Weekly Scores*

| # of Technical Posts this Week | Points |
|---|---|
| 4+ | 8.0 |
| 3 | 6.0 |
| 2 | 4.0 |
| 1 | 2.0 |
| 0 | 0.0 |

MAX = 8.0 points/week x 13 weeks = 104 points (100 points + 4 bonus points)
